Questions Sonora Campaign 2008

National Science Foundation developing Global Scientists Project

Instructions:

Use the given space to answer each question, please submit your completed form to Luis Mendez-Barroso before June 30th 2008

Name: ________________________________________

Institution: ________________________________________

Academic level: ________________________________

Questions:

1. What most interests you in your participation in this campaign? Please answer the question that best describes you as a participant. If you are:
   a. A student and not currently studying hydrology
   b. A student and currently studying hydrology
   c. A scientist or an engineer

2. Do you think you might have participated in a similar field campaign before? If so, please elaborate.
3. What are the keywords (scientific, economic, social, political, etc.) or interesting catchphrases that you would use to explain the importance and exciting nature of this campaign to your peers, friends, and/or family?

4. Please mention briefly who you think funded this campaign and what you think are the scientific and/or educational goals of this campaign.

5. Briefly mention, as much as you know, the experiments or groups of experiments that will be carried out and the areas/basins where they will be performed during this summer 2008 Sonora Campaign.

6. Briefly mention, as much as you know, the study area and the basin where we are conducting the fieldwork this summer.

7. Is there any specific experiment that you find particularly interesting, and why?
8. Is there any other experiment that you think should also have been included in this campaign, and why?

9. Please mention why do you think the campaign is being performed at this time of the year, and why in Sonora.

10. One of the objectives of this campaign is to develop global scientists and expose students to binational studies. How much do you think this experience will help you to interact inter-culturally and across disciplines (or in any other framework) in a global context?
